Malkins Miracle Products

**GP-Ecogrow – Bio-catalytic
Plant Growth Enhancer ideal
replacement for Urea.**

**Increasing yield and extending
life of crops.**

**Enhancing Global Food
Production whilst fighting
overuse of Chemical Fertilisers.**

Nonbacterial catalytic formulation designed around the amphiphilic molecule, increasing oxygen content whilst enhancing the microbial health of soils optimising the bioavailability of nutrients. Breaking down of excessive biofilm root growth protecting root health.

GP-Ecogrow is a multi-purpose liquid product providing accelerated growth in soils or other grow mediums including hydroponic and aeroponic systems, increasing crop yield.

Malkins products are Natural, Human and Pet friendly and are focused on fighting Pollution, Waterborne Disease, and reducing the worlds Green House Gas - CO₂ emissions.
