

GP4B-AN is a blend of micronutrients and biostimulants enhanced with *Bacillus*. It is used in anaerobic digestors to increase gas production and retention time while decreasing H<sub>2</sub>S levels. This blend of *Bacillus* and micronutrients helps reduce the bottleneck that occurs in the hydrolysis and acid production stages, meaning more time is available in the methanogenesis stage.

GP4B-AN has a microbial strength of greater than 4billion CFU/gram.

## Export Quality Container

Contains 25 x 450gm WSP

## Features

Multi-strain *Bacillus* blend.

Contains highest concentration of micronutrients and biostimulants to enhance biological activity

Helps improve facility stability and upset recovery

High CFU Rating.

Packaged in easy-to-use water-soluble packs (WSP)

Product produces multiple enzymes.

100% natural

Non-toxic, non-hazardous.
